Friday, May 7th

This seminar will consist of Emergency Response and Climbing Aerial Rescue protocols and techniques as they pertain to the Arboriculture Industry. The demonstrations will be performed in trees with and without canopy's. The infield environment will allow participants to view and evaluate rescue scenarios relevant to common work related practices. The techniques, equipment and protocols demonstrated will aid tree climbers of all levels, safety professionals, rescue professionals, company owners and sales officials.

Saturday, May 8th

This Hands-On Class will consist of Emergency Response and Climbing Aerial Rescue protocols and techniques as they pertain to the Arboriculture Industry. Participants will practice skills/techniques observed on May 7th in trees with and without canopies. The infield environment will allow attendees to perform and evaluate rescue scenarios relevant to common work related practices. The techniques, equipment and protocols demonstrated will aid tree climbers of all levels, safety professionals and rescue professionals. Climbers will be closely monitored to maintain a safe educational environment. To maintain an efficient instructor to student ratio this class will be limited to 20 participants. The participants must attend the Seminar on May 7th to participate on May 8th. Participants must supply their own P.P.E and basic climbing equipment. All equipment will be inspected for compliance with Industry Standards.
